Cardiovascular

DUROTIP™ TC Scissors

DUROTIP TC Ligature Scissors

- Carbide inserts help ensure sharp cutting edge (also in the distal area of the blades).
- Wavecut helps prevent suture materials from slipping.
- Identified by 1 gold-plated ring.

Noir™ Supreme Cut Scissors

Microtome Edge

Wavecut

Noir Supreme Cut Scissors

■ Noir

The combination of the renowned Aesculap Tungsten Carbide technology with the Aesculap Noir coating results in an extremely high surface hardness and therefore high wear resistance in daily hospital use.

■ Microtome edge

The extremely sharp cutting edge of the scissors blade facilitates gentle cutting of tissue with minimal use of force.

■ Wavecut helps prevent tissue from slipping out during the cutting process.

■ The WB after the item number indicates the Noir scissors are the wavecut style, e.g. BC211WB.

For more information about Noir Supreme Cut Scissors see our brochure number DOC637.

DUROGRIP™ TC Micro Needle Holders

Aesculap features Needle Holders with Tungsten Carbide (TC) inserts. A smooth jaw and three different serration patterns are available, depending on the size of the suture needle.

We recommend carbide inserts as follows:

Jaw Surface	Suture Material
Smooth	9/0 - 11/0
0.2 mm pitch of serration	6/0 - 10/0
0.4 mm pitch of serration	4/0 - 6/0
0.5 mm pitch of serration	up to 3/0

Titanium Micro Needle Holders

Aesculap Titanium Micro Instruments

- The extremely light Titanium material is an advantage for lengthy cardiac and vascular operations. This helps to carry on operating over longer time periods with minimum fatigue.
- The non-magnetic material makes working with particularly fine needles easier for you.
- Non-reflecting surface finish.
- Incomparable operating sensitivity: the Aesculap golf ball handle design.
- Unmistakable identification: the Aesculap color code.

For more information about Titanium Micro Instruments see our brochure number DOC890.

All needle holder jaws are coated with Aesculap Dia Dust™ diamond dust coating. This coating ensures that the inner surfaces provide the best possible performance in hardness and wear resistance. The texture of the jaws greatly increases its surface area, allowing you to grasp fine needles, sutures and soft tissue safely and securely. The needle quickly aligns itself in an ideal position in the rough surface. This results in a perfect grip that quite simply prevents any needle slippage.

Titanium Forceps

Aesculap Titanium Micro Instruments

- The extremely light Titanium material is an advantage for lengthy cardiac and vascular operations. This helps to carry on operating over longer time periods with minimum fatigue.
- Non-reflecting surface finish - for optimal glare reduction.
- The Aesculap golf ball handle design - gives incomparable operating sensitivity.
- The Aesculap color code - provides unmistakable instrument identification.

For more information about Titanium Micro Instruments see our brochure number **DOC890**.

All titanium forceps jaws are coated with Aesculap Dia Dust™ diamond dust coating. This coating ensures that the inner surfaces provide the best possible performance in hardness and wear resistance. The texture of the jaws greatly increases its surface area, allowing you to grasp sutures and soft tissue safely and securely.
